Profile Summary
I am a Software Engineer with 3 years of design, development and testing experience. I am currently pursuing my Masters in Computer Information Systems with dual concentration in IT Project management and Web application development at Boston University.

Education

Boston University   **2016-2017**
Masters in CIS
Semester 3
CGPA 3.65

National University of Science & Technology   **2010-2014**
Bachelors in Software Engineering
CGPA 3.15

Technical Experience:

01/14 - 01/16   **Eureka Tech, Pakistan**
Software Engineer
I designed and coded various versions of the Windows app "The Entertainer". Agile approach used to develop modules. Technologies used include **Asp.Net MVC 4.5**, **SQL Server** 2012. I also wrote test cases for the same app and administered them using **Test Link**.

06/14 - 12/14   **Microsoft Incubation Center**, **Pakistan**
IT Intern
During my internship, I learned to develop web sites using Asp.net 4.5. It was fun to work on a new technology specially knowing I was not familiar with Microsoft tools previously. I learned to work on **Asp.net 4.5** for web development. **SharePoint** managing and Application Deployment and administering using **Microsoft Cloud Services of Azure**.

06/13 - 01/14   **EVS Training Institute, Pakistan**
Web Developer Intern
I learned front end as well as back end development using **PHP, MYSQL, HTML, CSS**, and **JavaScript & JQuery.** It helped me in developing various small-scale projects during my undergrad like e-commerce, blogging web apps etc.

Recent Projects:

- Developed Airline ticketing system using **PHP and MYSQL**.
- **Mean Stack Development** for a Single Page Application of Taekwondo web.
- Prepared Project management Report on **Soli**. Soli is new Startup in Boston.
- Enterprise Architecture study and Research about **NetSol Technologies**.
- Hospital Management System using **SQL SERVER**.

Technical Skills:

- Programming skills in **C++, C#, Node.js, PHP, Python**.
- Front-end development in **HTML5, CSS3, JavaScript, jQuery, Bootstrap**.
- Developing & Consuming **Web API** using ASP .NET MVC, PHP and Node.js.
- DB development skills in **MYSQL, MS SQL SERVER 2012 & Mongo DB**.
- Version Control Management using **GITHUB**.
- Product management skills in **Agile** methodology using Version 1.
- Knowledge and understanding about **DEVOPS.**
